

Charles Blake Harrison

Frisco, TX | (972) 804-9185 | harrib93@icloud.com

Management Information Systems candidate graduating August 2026 with experience in automation, systems integration, troubleshooting, and digital operations

Education

Oklahoma State University – Stillwater, OK Expected August 2026
Bachelor of Science in Business Administration — Management Information Systems | GPA: 3.78

Tools & Technical Skills

Systems & Operations Workflow automation, systems troubleshooting, API integration, testing & debugging, workflow documentation, process improvement, workflow monitoring
Tools Git, Linux, Docker, Netlify, Nginx, Google Analytics, Google Tag Manager, Claude Code, Cursor, OpenClaw, MetaTrader 5
Development & Data Python, SQL, TypeScript/JavaScript, React, Next.js, FastAPI, pandas, PostgreSQL, PowerShell, Excel

Selected Systems & Automation Projects

AI Content Automation System — Harrison Insurance Agency 2025 – Present

OpenClaw · Linux · generative video · bundle.social API

- Built and operate an unattended Linux automation pipeline that generates, schedules, publishes, and monitors AI video content across four social platforms three times daily for a live business
- Integrated the bundle.social API for multi-platform scheduling — upload, processing-status checks, publish — with authentication handling and failure recovery
- Reviewed platform analytics and shifted production from educational content toward higher-performing comedy and skit formats

Algorithmic Trading and Risk Platform 2024 – Present

Independent Project · Python · MetaTrader 5 · pandas

- Built and operate a trading platform supporting multiple accounts, configurable strategies, backtesting, risk controls, and live monitoring
- Diagnosed and resolved live-order failures caused by a broker filling-mode incompatibility
- Implemented position-sizing, consecutive-loss, and daily-equity controls backed by automated tests; earned access to a \$75,000 funded account through an external evaluation

STRV — Ecommerce Storefront 2026 – Present

Client Project · Next.js · React · TypeScript · Tailwind

- Built and deployed an ecommerce storefront with 14 product pages, persistent cart functionality, and a complete checkout workflow
- Identified and fixed a price-tampering issue by validating product prices against server-controlled catalog data
- Tested and resolved implementation issues until the production build deployed with zero type errors

Additional projects: ClipBot — Python/FastAPI video-clipping pipeline (faster-whisper, FFmpeg) · PowerShell dashboard that risk-scores listening TCP services · Debian home-lab appliance (Pi-hole, Nginx, monitoring, FastAPI dashboard)

Professional Experience

Technology & Digital Operations — Harrison Insurance Agency, Frisco/Plano, TX Mar 2020 – Present

- Rebuilt the agency website (planoinsurance.com) in React/Vite on Netlify; implemented Google Tag Manager and Google Ads conversion tracking
- Operate the agency's AI content automation and social media systems; progressed from administrative support into managing its website, analytics, automation, and digital operations

Digital Marketing Intern — Dallas Digital, Dallas, TX May 2023 – Aug 2023

- Optimized Google Ads campaigns and client social media strategies; delivered analytics reports tracking performance, reach, and conversions

Additional Experience: Assistant Manager, Giovanni's Italian Restaurant, Frisco, TX (2022) · Owner & Operator, Luxury Lawn Services, Frisco, TX (2021)

Honors

President's Honor Roll – Oklahoma State University (Spring 2024, Fall 2025) · Dean's Honor Roll – OSU (Fall 2024) & Univ. of Arkansas (2022)
